Luminaires, because of their slim profile, provide the answer to many lighting problems, especially where limited space or low ceilings restrict the use of pendant lighting.

From plain, modern designs to the ornately decorated, Micromark can provide a style, finish or colour to suit all environments.

Belgravia

Energy saving products use less energy and therefore cost less to run. Just one energy saving recommended lamp can reduce household lighting costs by up to £78 over the lifetime of the lamp.* They also last up to 12 times longer than ordinary lamps.

Micromark offer a variety of energy saving light fittings for all types of rooms, just look for the energy saving logo as a quick way to spot the most energy saving products in our range.

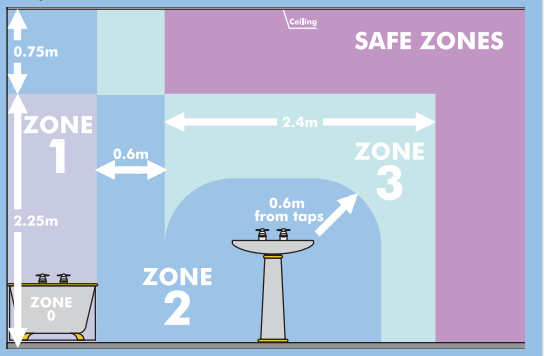
Suitability for Bathroom Installation

As a guide, for the correct location of lighting within bathroom and shower areas please refer to the illustration below.



Full details can be found in Amendment 3 (April 2000 Section 601) to the IEE Regulations (16th Edition).

Micromark's range of bathroom and shower downlights are suitable for use in zones 1, 2 and the outside zones (see above).
Products are supplied complete with a stirrup and enclosed terminal block, together with a sealed glass unit and rubber gasket. The fittings are available in a choice of styles and finishes, designed to complement any style of bath or shower room.
All fittings are manufactured to comply with current European safety regulations. The low voltage fittings require a 35W sealed dichroic MR16 lamp and need to be connected to a suitable single or multi output 12V transformer (not supplied).

A Mains Voltage GU10 IP65 Glass Shower Downlight
Clear flat glass.
Cut-out: 70mm.
Void depth: 135mm.
Rim dia: 100mm.

FIREHOLD

Micromark's range of Firehold downlights have an intumescent material within the downlight that swells to many times its original thickness - sealing gaps and ventilation holes to slow spread of fire. They give up to 90 minutes fire protection rating when installed in fire rated ceilings. The Firehold range have a pressed steel body and die cast aluminium fascia. Easily installed using spring wing mount, they come with a 10 year guarantee. They have been designed and manufactured with fire and acoustic protection built in and conforms to Building Regulations Part B, BS476, Part 21 (plaster board ceiling), Building Regulations Part B, BS476, Part 23 (suspended ceiling) & Building Regulations Part E (acoustic) and Part C (air movement).

GU10 Mains Voltage Fire and Acoustic Rated IP20 Fixed Downlight

FIRE AND ACOUSTIC RATED DOWNLIGHTS

Micromark are pleased to offer a new range of fire and acoustic rated downlights. Available in four finishes, each conforms to BS476 Part 21, fire resistance of 90 minutes (Building Regulations 2000 - Part B) and also BS EN ISO 140 - 3/ -6 Acoustic 0dB (Building Regulations 2000 - Part E). Constructed of a formed steel body with intumescent seals and a die cast aluminium fascia, these quality products all come with a 10 year guarantee.

Note: LV range lamps are of the aluminium reflector type, not dichroic type.

GU10 Mains Voltage Fire and Acoustic Rated Fixed Shower Downlight IP65

FIRE AND SOUND PROTECTION DOWNLIGHT COVER

Fire and Sound Protection Downlight Cover
Suitable for use with all commonly used lamp types and downlights with a void depth up to 150mm, this maintenance free, fully-intumescent downlight cover swells to over 3 times its original thickness when exposed to fire, offering in excess of 60 minutes protection. Easy to install from above and below the ceiling, it has multiple cable entry points and is fully ventilated to avoid over-heating of the light fitting. Self supporting and lightweight, it reduces the amount of heat that escapes from a room and reinstates the acoustic protection of the ceiling. Global assessment accredited for all common ceiling types and joist constructions. Size: (Max. HxDia.) 150x150mm.

Micromark's range of MQX Xenon™ GU10 lamps, spotlights and downlights incorporate Xenon technology. MQX Xenon™ GU10 lamps look identical to standard GU10 lamps and have the same twist fit bases, but due to their Xenon gas content, they last twice as long (5000 hours). This new technology not only saves you money on replacement lamps but also allows you to save up to 50% on maintenance costs.

Lamps available

GU10 & G9 MAINS VOLTAGE HALOGEN DOWNLIGHTS

Micromark is pleased to introduce a new downlight range to its comprehensive selection. The Quick Release downlights have a simple but effective release mechanism which makes that awkward task of changing a lamp much easier. Simply remove the wire clip and the lamp drops down giving you better access to remove the lamp from its fitting. Quick Release also includes the recently released MQX Xenon™ lamp which has double the life span of a normal GU10 lamp.

Micromark low voltage downlights are available in fixed, adjustable, square, wall wash, eyeball and surface mount formats and as pressed steel, or die cast versions.

All fittings require a sealed dichroic reflector lamp (not supplied unless otherwise specified).

The fittings need to be connected to a suitable single or multi output 12V transformer.

All are supplied complete with terminal block, lampholder, stirrup and fixings.

Manufactured to comply to current European safety regulations.

MQX XENON™ GU10 MAINS VOLTAGE SPOT LIGHTING

Mains Voltage spotlights operate at 230V, eliminating the need for a transformer. Products from the Berlin and Stylo ranges are supplied with new MQX Xenon™ GU10 Lamps, which have twice the life* of a standard GU10 lamp (up to 5000 hours). By using MQX Xenon™, you will save up to 50% on maintenance and replacement lamps.

Xenon lamps produce a well defined beam of light and add crisp, bright, colour-enhancing light to any room. All Micromark MQX Xenon™ fittings can also accept standard GU10 lamps.
The fittings are manufactured to comply with current European safety regulations.

*Compared to standard GU10 (2500 hours)

LOW VOLTAGE TRACK & SPOT LIGHTING

With the Micromark range of low voltage track and spotlights, you are offered a choice of spotlights and different lengths of track. This versatility enables you to design systems to suit most lighting requirements. Your system can be powered either by a local plug-in transformer or a remote one hidden from view. Flexibility is further increased by the use of a variety of track connectors or suspension kits which allows you to join or suspend two or more lengths of track. All components are manufactured to comply to current European safety regulations.

C 1 Metre Low Voltage Track
White finish. Rated 12V.
Size: (LxDia.) 1000x25mm.
Quote: MM31360

D 2 Metre Low Voltage Track
As above except size: (LxDia.) 2000x25mm.
Quote: MM31361

E 150W Plug-In Transformer
White finish. 230V/12V.
Non dimmable.
Size: (LxWxH) 210x55x45mm.
Quote: MM31369

All products below are suitable for use with Micromark LV Track MM31360/61.

F Live End For Low Voltage Track
Size: (LxWxH) 70x30x30mm.
Rated 12V. 15 Amp Max.
Quote: MM31362

G Straight Connector For Low Voltage Track
Size: (LxWxH) 47x15x15mm. Rated 12V.
Quote: MM31363

H Meteor Low Voltage Track Spot
Size: (LxWxH) 100x60x130mm.
Lamp: MR16 sealed dichroic (max 50W).
Quote: MM31366

I Orbital Low Voltage Track Spot
Size: (LxWxH) 110x60x120mm.
Lamp: MR16 sealed dichroic (max 50W).
Quote: MM31367

Micromark toroidal transformers use MCB's with reset functions and are maintenance free (except MM7758). The MCB's protect the lamps from power surges and will reset automatically when safe. The transformers also have a soft-start surge protection (except MM7758) and a self resetting thermal cut-out. All outputs on the transformers are rated up to a maximum of 50 Watts (except MM31374/5). Depending on the amount of outputs, the range covers 50 Watts (1 output) up to 500 Watts (10 outputs). Manufactured to comply with current European safety regulations.

B Unfused 50W Toroidal Transformer
50W max. Twin leaded. Dimmable.
Self resetting thermal cut-out.
Size: (HxDia) 75x62mm.
Quote: MM7758

C 50W Toroidal Transformer
50W max. Dimmable. Maintenance free.
Self resetting thermal cut-out.
Size: (HxDia) 95x60mm.
Quote: MM7718

D 200W Toroidal Single Output Transformer
200W max. Surge protection and thermal cut-out. Dimmable.
Size: (HxDia.) 120x95mm.
Quote: MM31374

300W Toroidal Single Output Transformer
300W max. Surge protection and thermal cut-out. Dimmable.
Size: (HxDia.) 140x95mm.
Quote: MM31375

E 200W Toroidal Transfomer
200W max. (4x50W outputs).
Dimmable. Self resetting thermal cut-out.
Size: (HxDia) 91x142mm.
Quote: MM7717

200W Toroidal Transfomer
300W max. (6x50W outputs).
Dimmable. Self resetting thermal cut-out.
Size: (HxDia) 160x138mm.
Quote: MM7726

F 60W Electronic Transformer
230V/12V. Pre wired. Dimmable.
Size: (HxL) 30x130mm.
Quote: MM31398

G 60W Electronic Transformer
230V/12V. 20-60W. Pre wired. Dimmable.
Self resetting thermal cut-out.
Size: (HxL) 30x130mm.
Quote: MM31386

H 60W Electronic Transformer
230/12V. 20-60W. Pre wired. Dimmable.
Self resetting thermal cut-out.
Size: (HxL) 29x85mm.
Quote: MM7768

I 60W Electronic Transformer
230V/12V. 20-60W. Dimmable.

105W Electronic Transformer
As MM7774 except 105W.
Quote: MM7775

J 105W Electronic Transformer
230V/12V. 50-105W. Dimmable.
Self resetting thermal cut-out.
Size: (HxL) 30x130mm.
Quote: MM31387

K 210W Electronic Transformer
230/12V. 50-210W. 0.75mm cable terminals.
Self protecting circuit.
Size: (HxL) 47x214mm.
Quote: MM73425

L 200W Electronic Transformer
230/12V. 50-200W. Dimmable.
Self resetting thermal cut-out.
Size: (HxL) 40x198mm.
Quote: MM7771

A 400W Toroidal Transformer
400W max. (8×50W outputs).
Dimmable. Self resetting thermal cut-out. LED indicator. Housed in a low profile white metal enclosure.
Size: (HxWxL) 95x220x270mm.
Quote: MM7731

500W Toroidal Transformer
As MM7731 except 500W max.
(10x50W outputs).
Quote: MM7732

Micromark electronic transformers are specifically designed to reliably operate all types of 12V halogen lamps and will drive any number of lamps up to the maximum loading of each transformer. The transformer is lightweight and of small size, making them ideal for large installations and for total flexibility especially in limited space.

The Micromark mains voltage track and spotlight range offers you a choice of colours and styles and a number of different spotlights using a variety of lamp types.
This versatility is further enhanced by the range of track accessories allowing you to extend your track system to suit most individual lighting requirements.
All components are manufactured to comply to current European safety regulations.

Luna

RECESSED MODULES

Micromark offer a range of HPF recessed and surface luminaires and louvres suitable for multiple interior installations.

Where recessed modules are used the suspended ceiling needs to be the exposed 'Tee' type with a 38mm high track support and 15mm or 24mm wide visible track flange. Apart from MM8171/2, all recessed modules are supplied complete with a louvre and are suitable for both 15mm and 24mm ceilings.

Tubes not supplied with the fitting. Use:
2ft 18W - any 18W T8 tube.
4ft 36W - any 36W T8 tube.

Manufactured to comply to current European safety regulations.

A Recessed Module
600x600mm.
Size: (HxWxL) 65x594x619mm.
Lamps: 4x18W.
Quote: MM8171

As MM8171 except 1200x600mm.
Size: (HxWxL) 65x594x1229mm.
Lamps: 4x36W.

Emergency lighting is mandatory for all large workplaces and public buildings. 'Maintained' units remain 'on' at all times, operating from normal mains voltage, and switch to battery operation if there is a power failure. 'Non-maintained' units are 'off' and are activated only in the event of a power failure. Each unit contains a battery pack, battery charger and control circuitry. Manufactured to comply to current European safety regulations.

A Emergency Non-maintained Twin Spot
White finish. 2x20W halogen lamps supplied. Output: 410 lumens per lamp. Lamps can be rotated left/right and up/down. 3 LED indicators - 2 for lamps and 1 for mains. 2x12V 7Ah/20 HR sealed lead acid batteries. Portable or wall mountable. Dims: (HWD) 127x370x355mm. IP20.
Quote: MM74506

B IP65 Bulkhead
AC 230V 50Hz. White finish with clear plastic diffuser. Suitable for fitting on walls. LED charging indicator. Size: (HWD) 105x347x80mm.
Lamp: 8W T5 (supplied).

colour master®

Micromark are pleased to offer the innovative ColourMaster® LED range. The lights flow through the colours of the rainbow, making them ideal for mood lighting and creating fun effects in any indoor location. Choose from round fittings in chrome or brass or rectangular fittings in chrome finish.
The kits can be expanded using Micromark ColourMaster® add-on fittings. See **Expanding Your Kit** section.

The ColourMaster® LED Kits come supplied with a small controller which allows you to control the speed of colour change or to select a specific colour according to your mood.

AWARD WINNING

Winner of the 'Best New Product' Award at the Lighting Show

Use under shelves to highlight features

Mount on laminate or wood floors for sophisticated mood lighting effects

Add a touch of class and some colour to your kitchen

A **ColourMaster®**
Colour Changing Rectangular LED Lighting Kit
Includes 4 x rectangular LED fittings.
Polished chrome finish.
Supplied with ColourMaster® Controller for changing colour and speed with 15m cable.
9V DC plug-in adaptor with 1.8m cable.
Size: (HxWxProj.) 67x107x9mm.
Quote: MM74707

B **ColourMaster®**
Colour Changing Round LED Lighting Kit
Includes 4 x round LED fittings.
Polished chrome finish.
Supplied with ColourMaster® Controller for changing colour and speed with 15m cable.
9V DC plug-in adaptor with 1.8m cable.
Size: (Dia.xProj.) 83x9mm.
Quote: MM74706

C **ColourMaster®**
Colour Changing Round LED Lighting Kit
Includes 4 x round LED fittings.
Polished brass finish.
Supplied with ColourMaster® Controller for changing colour and speed with 14m cable.
9V DC plug-in adaptor with 2m cable.
Size: (Dia.xProj.) 83x9mm.

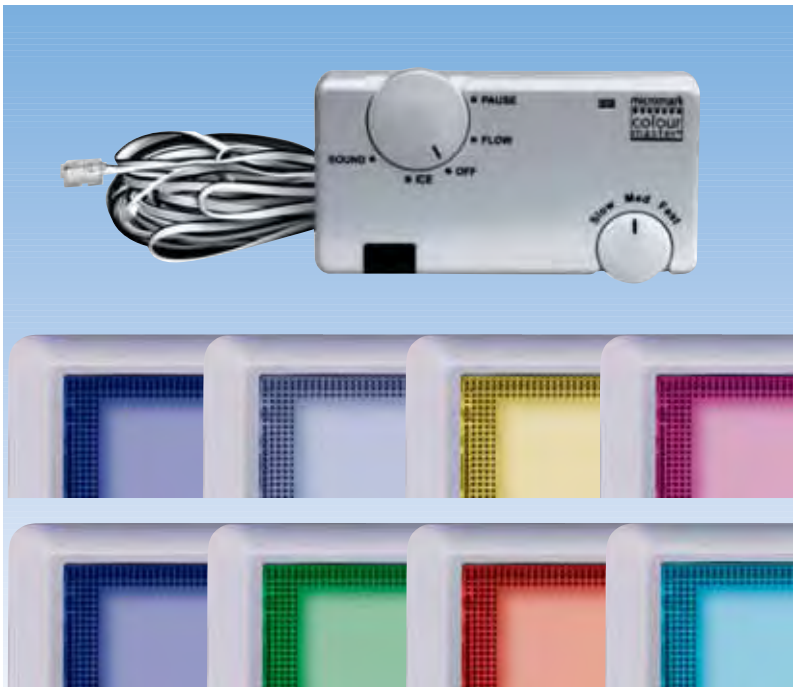
Expanding Your Kit

Expand your kit by purchasing add-on fittings.
An additional 4 fittings can be added to the ColourMaster® Kits (with small controller) and an additional 8 fittings can be added to the ColourMaster® Deluxe Kits (with large controller).

D **ColourMaster® Pack of 2 Round Add-on Fittings**
To be used with MM74706 & MM74708.
Polished chrome finish.
Quote: MM74704

E **ColourMaster® Pack of 2 Rectangular Add-on Fittings**
To be used with MM74707 & MM74709.
Polished chrome finish.
Quote: MM74705



colour master®

Micromark is proud to offer this range of Colour Changing LED Candles - the latest addition to the ColourMaster® Range.

Each candle has a multi-colour LED unit inside which automatically flows through the colours of the rainbow. Alternatively, you can stop the LED on a specific colour to suit your mood or interior decoration.

The candles have a 'hint of vanilla' fragrance and are supplied with a 4.5V battery which lasts for up to 100 hours. The 13cm candle has a burning time of 20 hours and the 17cm candle will burn for 30 hours.

Replacement candles are also available for both the small and medium sized candles.

ColourMaster® Colour Changing LED Candles Display Unit
Contains 48 small candles.
MM74401

ColourMaster® Colour Changing LED Candles Display Unit
Contains 48 medium candles.
MM74402

ColourMaster® Colour Changing LED Candles Display Unit
Contains 12 small candles and 36 medium candles.
MM74403

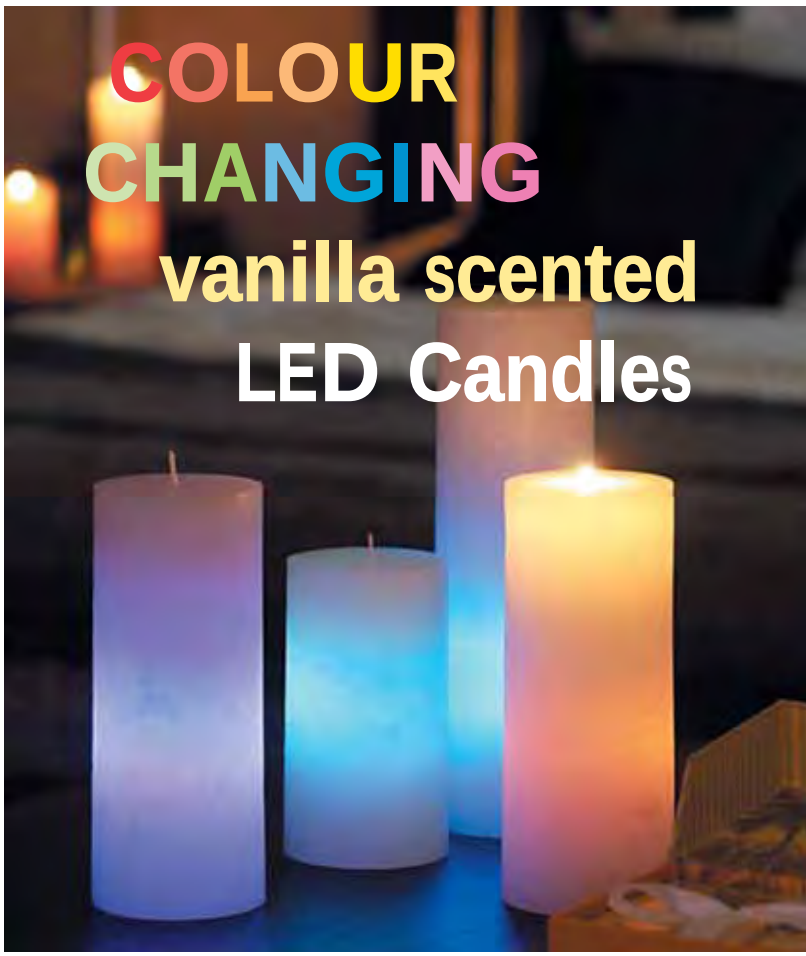
Small ColourMaster®
Colour Changing LED Candle
Real candle with 'hint of vanilla' fragrance (approx. 20 hours burning time).
Contains multi-colour changing LED unit.
Powered by a 4.5V battery (supplied) - lasts for up to 100 hours.
Size: (HxDia.) 135x70mm.
Quote: MM40563

Small Replacement Candle
Size: (HxDia.) 135x70mm.
For use with LED unit from MM40563/4 Colourmaster® Colour Changing LED Candles.
Quote: MM40616

Replacement Battery
4.5V
Lasts up to 100 Hours
For use with LED unit from MM40563/4
Quote: MM40618

Medium ColourMaster®
Colour Changing LED Candle
Real candle with 'hint of vanilla' fragrance (approx. 30 hours burning time).
Contains multi-colour changing LED unit.
Powered by a 4.5V battery (supplied) - lasts for up to 100 hours.
Size: (HxDia.) 170x70mm.
Quote: MM40564

Medium Replacement Candle
Size: (HxDia.) 170x70mm.
For use with LED unit from MM40563/4 Colourmaster® Colour Changing LED Candles.
Quote: MM40617



colour master®

WEATHERPROOF colour changing LED kits

- Can be used indoors or outdoors
- High weather resistance of IP66 (water-tight & dust-tight)
- New LED technology - lights flow through the colours of the rainbow
- Supplied as complete kits including controller
- Kits expandable up to 10 fittings (MM70058 & MM70059 only)

A 19mm Colour Changing LED Lighting Kit (4 Lights)
4x19mm IP66 LED fittings in plastic housing with stainless steel trim.
12V indoor plug-in transformer with 1.8m cable.
Colourmaster® controller with 15m cable.
Transformer supplied can power a maximum of 10 LED lights per kit.
Size: (HxDia.) 38x19mm.
Quote: MM70058

Individual 19mm Add-on Fitting
Plastic housing with stainless steel trim.
Size: (HxDia.) 38x19mm. IP66.
Quote: MM70060

KIT OF 4 COLOUR CHANGING LED LIGHTS

B 30mm Colour Changing LED Lighting Kit (4 Lights)
4x30mm IP66 LED fittings in plastic housing with stainless steel trim.
12V indoor plug-in transformer with 1.8m cable.
Colourmaster® controller with 15m cable.
Transformer supplied can power a maximum of 10 LED lights per kit.
Size: (HxDia.) 30x30mm.
Quote: MM70059

Individual 30mm Add-on Fitting
Plastic housing with stainless steel trim.
Size: (HxDia.) 30x30mm. IP66.
Quote: MM70061

KIT OF 4 COLOUR CHANGING LED LIGHTS

C 30mm Deluxe Colour Changing LED Kit (10 Lights)
10x30mm IP66 LED fittings in stainless steel housing. 12V indoor plug-in transformer with 1.8m cable. Deluxe Colourmaster® controller with 15m cable controls colour, speed & features including 'Sound to Light' technology where LEDs can be set to change colour in time with music, beats or clapping. Also includes remote control for easy operation.
Size: (HxDia.) 26x30mm.
Quote: MM70067

KIT OF 10 COLOUR CHANGING LED LIGHTS

LED LIGHTING
TWILIGHT® 66
HIGHLY WEATHER RESISTANT

LED - the facts

- LEDs are less damaging to the environment than incandescent lamps as they use up to 90% less energy.
- As LEDs are cool running, they can be safely used in applications where they may be touched.
- As LEDs contain no moving parts e.g. glass or filaments, they last longer and are more reliable than other lamp types.

Twilight® LED fittings are easy to install, with no need to dig deep trenches for the 12V, extra safe cable beneath the ground.

The neat dimensions of Twilight® and Twilight® 66 LED fittings make them ideal for recessing into decking, patios and driveways, as well as for indoor applications such as flooring and step edges. The products are so flexible, you can even use them for decorating plants and trees.....

15mm

A Twilight® 66
15mm LED Lighting Kits (4 Lights)
Kit of 4x15mm round IP66 LED fittings, in steel housing each with 5m cable.
12V indoor transformer.*
10 way junction box with 10m cable.
Each fitting contains 1 Super Bright LED.
Size: (HxDia.) 39x15mm.

White LEDs **Quote: MM70012**

Radius Range

The popular range of Radius fittings has now been extended to include bollard and security lighting options and a choice of finish in some lines. The fittings are constructed of rust proof stainless steel (except black finish - aluminium construction) - perfect for highlighting features and flowerbeds.

This range of house sign lights from Micromark offers simple yet effective solutions to the problem of distinguishing house signs or numbers at night. MM18173 is provided with self-adhesive letters and numbers, allowing the user to personalise their fitting. The products use two different power sources - mains voltage and solar energy - and comply with current European safety regulations.

A Solar House Sign Light
Super bright white LED illuminates house signs, door bells etc.
Integral solar panel charges in daylight.
Dusk 'til dawn operation.
Size: (HxWxProj.) 40x220x105mm.
Includes 3xNi-Cad AA rechargeable batteries.
Quote: MM18174

B Mains Voltage House Sign Light
Rust proof stainless steel construction.
Opal plastic diffuser.
Includes three sets of 0-9 and A-Z.
Size: (HxWxProj.) 260x225x95mm.

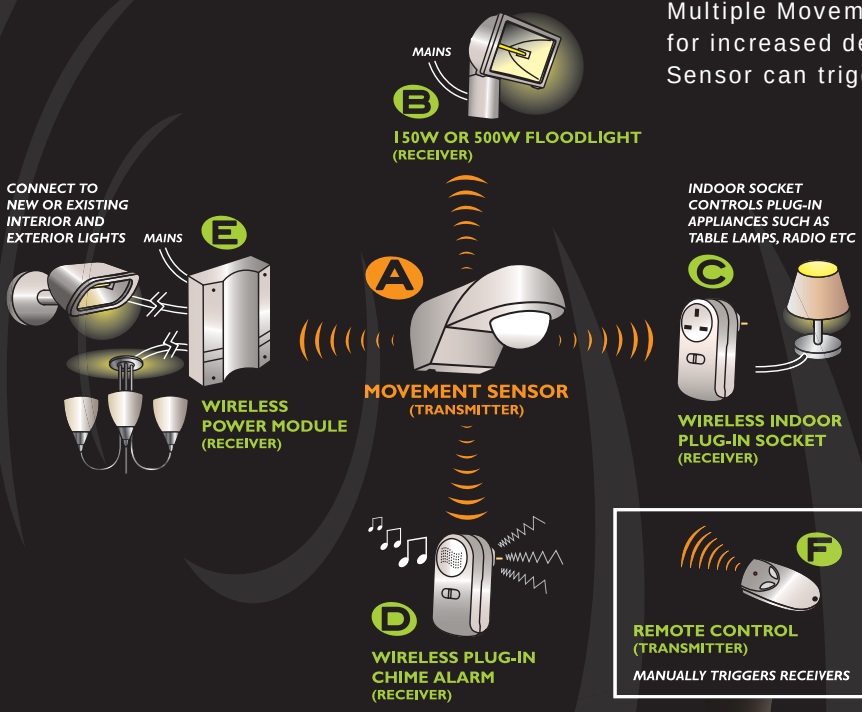
sense-it
WIRELESS SECURITY SYSTEM

An easy to install wireless security system that gives an amazing range of options to provide total peace of mind and protection. Each item in the Sense-it range can be purchased individually, so you have the flexibility to pick and choose all the items you require. Multiple Movement Sensors can be purchased for increased detection and each Movement Sensor can trigger a number of receivers.



RANGE AVAILABLE IN DECEMBER

Sense-it 150W Floodlight Starter Kit
Kit includes 150W Floodlight (MM70264) and Movement Sensor (MM70267). See specification of products on page 99. When anyone is detected by the movement sensor a wireless signal activates the 150W floodlight. Kit is expandable so you can add other Sense-it products.
MM74522

Sense-it 500W Floodlight Starter Kit
As above but 500W floodlight with 500W linear tungsten halogen lamp.
MM74523

Sense-it Plug-In Socket Starter Kit
Kit includes Plug-in Socket (MM70269) and Movement Sensor (MM70267). See specification of products on page 99.
When anyone is detected by the movement sensor a wireless signal is sent to the indoor plug-in socket. The socket then automatically turns on a lamp, radio or other appliance connected to it. Kit is expandable so you can add other Sense-it products.
MM74524

Add-On Movement Sensor
Works with all products in the Sense-it range. 12m / 270 degrees detection range. Powered by 9V PP3 battery (not supplied). Wall or ceiling mountable. Transmitter range 50m. Silver finish.
MM70267

Sense-it Remote Control
Battery operated (12V 3LR50 - supplied). Activates and controls Sense-it Floodlights, Chime Alarm, Power Module, Plug-In Socket. Silver finish.
MM70268

The following products are activated by a wireless signal from the movement sensor:

Add-On Sense-it 150W Floodlight
Mains powered. IP44 weatherproof. Time-on in response to detected movement - adjustable from 10 sec to 10 min. Floodlight can be angled up and down as required. 150W linear tungsten halogen lamp (supplied). Adjustable lux levels. Silver finish.
MM70264

Add-On Sense-it 500W Floodlight
Same as above but 500W floodlight with 500W linear tungsten halogen lamp.
MM70265

Add-On Sense-it Plug-In Socket
Automatically turns on a table lamp, radio or other appliance connected to it. Time on in response to detected movement - adjustable from 10 sec to 10 min. Switching capacity: 1000W incandescent/ 500W fluorescent load. Indoor use only. White finish.
MM70269

Add-On Sense-it Plug-In Chime Alarm
Sounds a welcome chime or perimeter alert for your home. Indoor use only. White finish.
MM70270

Add-On Sense-it Power Module
Switches on multiple appliances (both exterior or interior) such as light fittings, garden lighting, powered water features. IP55. Time-on adjustable from 10 sec to 10 min. Silver finish.
MM70266

For further information on the Sense-it Wireless Security System please contact our dedicated Micromark Helpline on 0844 871 0011

Security lighting is an essential part of securing a property. All Micromark security floodlights are enclosed, glass fronted fittings, weather resistant up to IP44. They all come in full colour packaging with comprehensive fitting and operating instructions.
They are all made from rust proof die cast aluminium. See the table below for individual product information and refer to the key for further definition.

3 OPERATING MODES (See Table)

Night Time Only Mode
For normal night time security operation.
(variable time on: e.g. 30 seconds to 20 minutes).

Day Time Test Mode
For testing the PIR floodlight during daylight.

Continuous Floodlight Mode
For continuous floodlight illumination
(up to 8 hours). Automatic switch off.

Adjustable Time On
Controls the time that the light stays illuminated after activation.

Adjustable PIR Sensor Range
Increases or decreases the distance of sensor detection, (up to 15m).

Adjustable Lux
Adjusts the sensitivity of the PIR sensor to different light levels.

Adjustable PIR Sensor Angle
All Micromark Security floodlights have a fully adjustable PIR sensor for optimum detection.

Adjustable Floodlight Angle
All Micromark floodlights can be angled up and down as required.

A

A Evolution® Energy Saving PIR Floodlight
The first floodlight to be endorsed by the Energy Saving Trust. Comes supplied with a 100W linear tungsten halogen lamp and a 9W PL-S Pro Compact fluorescent lamp. Consumes 70% less energy than a standard 500W floodlight. Brings significant savings in lower running costs and designed to minimise light pollution. Added security with an optional all night ambient light. Silver finish. Rust proof die cast aluminium construction. Size: (HxWxProj.) 225x210x215mm.
Quote: MM4900

Choose between two operating modes:

MODE 1
During the hours of darkness, the PL Lamp will illuminate to give a constant ambient light. When movement is detected by the PIR, it triggers the halogen lamp, which remains lit for between 5 seconds and 10 minutes.

9W PL Lamp
Dusk to dawn - constant

100W Halogen Floodlight
5 seconds to 10 minutes - once activated

MODE 2
The floodlight is unlit until the PIR sensor detects movement, whereupon both the PL and halogen lamps are lit. The halogen floodlight remains illuminated for between 5 seconds and 10 minutes. After this the PL lamp is illuminated for up to one hour.

9W PL Lamp
Up to 1 hour - once activated

100W Halogen Floodlight
5 seconds to 10 minutes - once activated

Wireless floodlights

Micromark's wireless floodlights use the latest Radio Frequency (RF) technology and operate at 433Hz.

F 500W Floodlight & Wireless PIR Kit
This system features a 500W Floodlight and a remote wireless PIR sensor. Whenever a person walks into the sensor field of the PIR, a coded radio signal is sent to the floodlight, causing it to switch on for a fixed time. The light will not operate during daylight hours.
Quote: MM18152

The 500W Floodlight
Mains wired, easy to install. Fixed 3 minute time 'on'. Add as many additional floodlights as you require to the kit to protect your home, garden, shed, outbuilding etc. (sold separately). Security coded (adjustable).
Lamp: 500W Linear Tungsten Halogen (supplied).

The Wireless PIR Sensor
No wiring required (uses 9V PP3 Alkaline battery - not supplied). Can be sited wherever required up to 50m away from floodlight (line of sight). Add as many extra PIR sensors as you require to the kit (sold separately). Security coded (adjustable). Range fixed up to 12m. 110° angle of detection.

Switch On
The floodlight can also be switched on for 3 minutes by using the wireless remote key fob (sold separately).

H

NATIONAL HOME SECURITY WEEK

Micromark is proud to sponsor National Home Security Week, which aims to raise the awareness of the simple, affordable, yet effective things you can do to protect your home.

Surveys of convicted house burglars found that, along with home CCTV and alarms, bright outdoor security lighting is a major deterrent to any potential intruder.
Micromark offers a wide range of outdoor security lights to help make the home more secure, including the innovative Vigilantern™ CCTV in a lantern and Maxicam CCTV in a floodlight. These products have an in-built CCTV camera for the ultimate in discreet surveillance.

For more information about CCTV/Alarms or National Home Security Week call Micromark on 020 8829 6354 or visit *www.homesecurityweek.co.uk*

Vigilantern™

A CCTV in a Lantern
See and hear who's at the door. Simply switch to the AV channel to see the camera view. Vandal resistant polypropylene lantern in black finish with clear panels.
Kit includes Vigilantern™ with powered SCART plug and 17 metre cable, mains adaptor, fixing kit and fully illustrated instructions.
Size: (HxWxProj.) 320x175x210mm.
Lamp: 60W ES GLS.
IP23.
Quote: MM23177

Maxicam

B Floodlight & Camera System
See and hear your visitors approach. Rust proof die cast aluminium 300W floodlight in black finish. 120° PIR sensor detects movement and switches light on at night. Simply switch to dedicated channel to see the camera view. Camera view can be seen on any TV if connected to the aerial system using the modulator supplied. Kit includes: Maxicam PIR floodlight, 300W halogen lamp, modulator, remote key fob, 17 metre cable, mains adaptor, fixing kit and fully illustrated instructions.

G Outdoor Bulkhead with Microscan 240™ MKII PIR

Tough polypropylene moulded housing and eyelid. Black finish. Opal diffuser.
Size: (HxWxProj.) 185x255x85mm.
Lamp: 60W ES GLS. IP33.
Quote: MM18058

Please refer to page 104 for details of Microscan 240™ MKII PIR features.

The **Microscan 240™ MK1I** is, we believe, the world's smallest Passive Infra-Red motion sensor. Developed by Micromark Research and Development, it has the following specifications:

- Detection Range - 8m approx.
- PIR Sensing Angle - 100° approx.
- Recommended mounting height - 1.5m approx.
- Automatic night-time only operation.
- Day time test mode.
- Continuous light mode (max 8 hours).
- 'On' time - approx. 1 min. 40 sec. from last sensor detection.
- Max. load 100W.
- LUX levels - 2.8 on and 44 off.
- U.K. registered design.

The **Microscan 240™ MK5** has the same features as the MKII but has a PIR sensing angle of 180°.

The **Microscan 240™ MK6** has similar features to the MKII but with the additional features: - adjustable range and adjustable time.

All Micromark security lanterns are fitted with a Microscan unit.
